Applicant's submission filed on 8-18-2010 has been entered.

2. Claims 1-12 and 15 are pending and have been examined.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Won Kim on 5-14-2010.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 1 of the Specification, please amend the first paragraph as shown below:

This application is a continuation of U.S. Patent Application Serial No. 10/434,749 filed May 9, 2003, now US Patent 6,768,797, which is a continuation of U.S. Patent No.10/081,750, filed February 21, 2002, now abandoned, which is a continuation of U.S. Patent No. 6,385,316, issued May 7, 2002, which is a continuation of U.S. Patent No.6,075,859, issued June 13, 2000, all assigned to the assignee hereof and hereby expressly incorporated herein.

IN THE CLAIMS:

Please amend claims 1 and 15 as shown below:

1. In a communications system, a method of transforming a set of message signals representing a message comprising: first encoding one of said set of message signals in accordance with a first keyed transformation by a hardware processor; second encoding said one of said set of message signals in accordance with at least one additional keyed transformation by the hardware processor; third encoding said one of said set of message signals in accordance with a self inverting transformation in which at least one of said set of message signals is altered by the hardware processor; fourth encoding said one of said set of message signals in accordance with at least one additional inverse keyed transformation wherein each of said at least one additional inverse keyed transformation is a corresponding inverse of said at least one additional keyed transformation by the hardware processor; and fifth encoding said one of said set of message signals in accordance with first inverse keyed transformation by the hardware processor wherein said first inverse keyed transformation is the inverse of said first keyed transformation; wherein said step of first encoding is performed in accordance with a first table and in a first direction, and wherein said step of second encoding is performed in accordance with said first table.

15. A method of transforming a set of message signals in a communication system, the method comprising: generating a table by strict permutations by a hardware processor; first encoding one of said set of message signals in accordance with a first keyed transformation by the hardware processor; second encoding one of said set of message signals in accordance with a self inverting transformation in which at least one of said set of message signals is altered by the hardware processor; and third encoding one of said set of message signals in accordance with a second keyed transformation by the hardware processor, wherein said second keyed transformation is the inverse of said first keyed transformation; wherein the first and third encoding is performed in accordance with said table, and wherein the first and third encoding are performed in alternating directions.

Allowable Subject Matter

4. Claims 1-12 and 15 are allowed.
5. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field does not each the combination of features of the claimed invention, particularly including the method of the Applicant's claimed invention of transforming a message via the combination of multiple encoding steps utilizing keyed transformations, self-inverting transformations, and inverse keyed transformations, where the first two encoding steps are performed with reference to a table, all in the manner of the Applicant as claimed and as set forth in his disclosure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
